

ROB MCKENNA *for GOVERNOR*

Dear

Thank you for electing me as your Attorney General. Despite the obstacles of working in a Democrat-controlled state capitol, I can report success since taking office in 2005.

Working with people regardless of party, I've passed more than 40 bills through the legislature and Governor's office; I've instituted a performance culture in the Attorney General Office so we can provide more state services with fewer employees (yes, it can be done); and, on the national front, I'm defending your freedom against the Obamacare mandate forcing you to buy government-approved health insurance.

I believe I have made a real difference for Washingtonians as your Attorney General.

But, the challenges facing our state right now are substantial – including huge budget growth which has driven calls for more state taxes, including an income tax – and frankly, there has been a disappointing lack of leadership in Olympia to tackle these problems.

It is time for fresh ideas and innovative solutions. It is time for real leadership and a new direction for Washington state.

That's why I am running to be your next Governor.

As one of only a handful of Republicans to win statewide executive office in recent years, **I've shown that I am willing to take on the status quo and lead positive change for our state.**

And, that is precisely why the extreme Left will come out swinging hard against me – in fact, they already have done so, launching a web site attacking me in February – of last year! I must build a strong campaign, focused on facts and specific ideas for our future, to defend against their misinformation and mud-slinging.

I need your support now more than ever.

You've been a faithful supporter of Republican candidates, Doreen, and I appreciate all you've done. **Please let me know I can count on you right now by rushing back your most generous financial gift of \$25, \$50, \$100, \$250, \$500, \$1,000 or even \$1,600 today.**

Too many of our neighbors and loved ones are out of work or working too few hours to make ends meet. College tuition is going up, just as take-home pay goes down. Too many of our children are not receiving the quality education they deserve – and need.
