

# STRATEGIES 360

A SURVEY OF LIKELY PRIMARY VOTERS  
WASHINGTON CONGRESSIONAL DISTRICT 1

CROSSTAB RESULTS | JULY 2012

---

PREPARED BY STRATEGIES 360

## STATEMENT OF METHODOLOGY

Strategies 360 conducted a live telephone survey of 500 registered voters in Washington Congressional District 1 who indicated they were likely to vote in the August Primary election. Respondents were selected randomly from a list of registered voters who 1) voted in at least one primary election since 2004, or 2) voted in at least one of the last two odd-year General Elections, or 3) registered to vote after the 2011 General Election. Interviews were conducted July 15 - 17, 2012 by trained interviewers. A combination of landline and cell phones were called to ensure greater coverage of the population sampled.

The margin of error for the base sample of 500 interviews is  $\pm 4.4\%$  at the 95% confidence level. The margin of error is higher for the demographic subsamples in the tables below. As with all telephone surveys, other sources of error not accounted for by the stated statistical margin of error include, but are not limited to, question wording, question order, coverage bias and response bias.

## BANNER DEFINITIONS
